

Patients and healthcare providers' perspectives on diagnosis and management of trigeminal neuralgia

Study Day Aims

Improve understanding of the diagnosis and management of trigeminal neuralgia through interaction between sufferers of the condition and healthcare professionals.

The conference aims to actively involve the patient throughout the conference - *'nothing about us without us'*

Objectives

- Discuss the complexity of a diagnosis of trigeminal neuralgia
- List the imaging techniques that may help improve diagnosis or inform on management
- Recognise the differences that arise between what healthcare professionals prescribe and what patients actually do
- Identify core outcome measures when evaluating patients with trigeminal neuralgia
- Compare the different surgical options for trigeminal neuralgia
- List additional support that can be provided for patients and healthcare providers on trigeminal neuralgia

Faculty

Ms Jillie Abbott	<i>TN sufferer & TNA UK trustee</i>
